

Agenda, C4 Board Meeting 16 Jul 07, 1:30 PM Library

1. Purpose: The main objective of this meeting will be to develop a C4 position regarding PUDs, MSDs, and Cluster Dev so that committee leads can draft position papers. The objective is to conclude the meeting having agreed upon a C4 position in each area. It is premature to finalize a water position on specifics but we can draft an initial water paper which at least lists areas of concern, future research direction, and focal areas with water.

We can use the Land Use Analysis Criteria provided and our own Public Policy Formulation model to help develop our positions. We will have to be creative since we are simply analyzing specific land use tools which are being proposed in the county vs trying to solve a defined problem. Nevertheless, the basic techniques will work.

2. Other areas for discussion:

- Rural land use policy visa vie using the PUD process
- Ranches used as 401Ks and the real facts
- Learn about Tabor and _____
- Learn about Office of Smart Growth
- Define “low density” as used in county documents
- County vs Valley terms
- Building codes position
